### CAREER OBJECTIVE

Full-Stack Web Developer (E-Square.io) with experience in writing single-page-applications using the latest WEB technologies. Graduate of the Coding Academy - 640 hours of an intensive coding Bootcamp. Capable of adapting to intense environments and learning at a fast rate.

### Experience

#### Full Stack Developer – E-Square (May 2023 - present)

(Angular , Node.js , AWS)

- I am responsible for developing and designing end to end solutions with Angular & Node.js, bridging the gap between front-end user experience and back-end system functionality.

Engaged directly with the clients to plan and optimize site issues and queries, design and implemented new product features and web architecture.

I am working with a Mongo DB database that interfaces with warehouses, products inventory, purchase orders, suppliers and customers of the company.

#### Software Implementation - Government office (2021 - 2022)

(classified technology)

- Responsible for access privileges for Visitors and Employees in a government office.
- Give service for high ranking officers like ministers in the government.

### Personal Experience

#### Project Management System

- Kanban-style task management board app inspired by trello.com
- The app uses webSockets to update the board in real-time. The API calls are done with REST API architecture.
- I used middlewares to authenticate and authorize actions.
- Login/Sign up sessions , Dashboard (Chart2.js)
- [React] [SASS ][MongoDB] [D&D] [REST API] [Socket.IO] [Express] [Google API]

#### Crypto wallet

- Virtual Crypto wallet with users and contacts which you can transfer money between them, HTTP request for Market price, Bitcoin value and more.
